# Course: Information Security Management

Code	City	Hotel	Start	End	Price	Language - Hours
665	Zurich (Switzerland)	Hotel Meeting Room	2025-12-29	2026-01-02	5450 €	En - 25

## The Course

Information is the lifeblood to all organisations, without which it would be severely impacted and ultimately cease to function. Information is knowledge and knowledge is power. With an ever-changing climate of technology and threats (both technical and human), the need for trained security personnel to protect our information becomes increasingly critical evolutionary task.

Information is at risk from many sources, legal, electronic, physical, internal and external to mention a few. It is paramount that security and related management personnel have an understanding of the risks, controls and countermeasures that are available to secure information and technology within an effective management framework. Furthermore utilising countermeasures, best practice and management techniques will mitigate electronic and physical risks and enhance protection to an organisation.

## The Goals

**On successful completion of the seminar, delegates will be able to have:**

- Knowledge of the concepts relating to information security management (confidentiality, integrity, availability, vulnerability, threats, risks, counter measures, etc).
- Understanding of current legislation and regulations which impact upon information security management.

- Awareness of current national and international standards such as ISO 27002, frameworks and organisations which facilitate the management of information security.
- Understanding of the current business and common technical environments in which information security management has to operate.
- Knowledge of the categorisation, operation and effectiveness of controls of different types and characteristics.

## **The Delegates**

The seminar has been designed for individuals responsible for Risk Management, IT Security and IT Security Auditing, Technical IT Management and those with involvement of systems integration and corporate IT development. Financial controllers with a technical interest may also benefit from the seminar.

## **The Process**

Participants will gain detailed knowledge by active participation in seminars, group discussions and real life case studies.

Delivery will be by presentation, group syndicate investigations, training DVD and interactive seminars.

## **The Benefits**

The seminar will provide delegates with an understanding of IT Security Management and the commercial challenges which are faced on a daily basis, and how these are exploited. Furthermore, delegates will be able to appreciate placement of security controls within IT Systems and Networks and how these can be effectively implemented and audited, to ensure full system reliability, scalability and security. At the conclusion of the seminar delegates will be able to appraise risk, recommend security controls and develop an appropriate IT Security Management Approach applicable to their

organisation culture and ethos.

## **The Results**

Organisations will be better educated in relation to risks and will be able to adopt justified procedures for the security of their systems, within an appropriate Information Security Management Framework. This in turn will allow executives to place good reliance on controls which safeguard information and business processes. Being able to adapt current best practice in accordance with International Standards will ensure that companies benefit from leading solutions.

## **The Course Content**

### **Day One**

#### **Information Security Management - An Overview**

- IT Risk Management
  - Categorising Physical and Electronic Risk
- IT and Networks
- Computer Systems Design
- Legal and Regulatory Considerations
- Information, Business and Risk - Case Study

### **Day Two**

#### **Information Security Management**

- Ensuring Information Security
- Confidentiality

- Integrity
- Availability
- Authenticity
- Non Repudiation of Data
- Ethical hacking and Industrial Espionage
- Where to design and place effective computer and management controls
- Case Study

## **Day Three**

### **Information Management - International Standards**

- Code or Practice for Information Security Management - ISO 17799 / ISO27002
- Best Practice and Implementing Guidance and Controls For ISO27002
- Information Security Management Overview
- Risk Assessment and Controls
- Security Policy Documentation
- Organising Information Security Management
- IT Asset Management
- Personnel and Human Resources

## **Day Four**

### **Information Management ISO27002**

- Best Practice and Implementing Guidance and Controls For ISO27002
- Physical and Environmental Security
- Operations Management and Communications
- Access Control
- Information Systems (Design, Development, Maintenance)
- Incident Management

- Business Continuity
- Regulatory Compliance
- Best Practice and Implementation Guidance for BS ISO/IEC 38500:2008 - IT Management
- Case Study

## **Day Five**

### **Implementing Effective Information Security Management Frameworks**

- Successful steps for IT Security Management
- Audit and Compliance for IT Resources
- Business Process Engineering
- Case Study

**The Scandinavian Academy for Training and Development employs modern methods in training and skills development, enhancing the efficiency of human resource development. We follow these practices:**

• **Theoretical Lectures:**

- We deliver knowledge through advanced presentations such as PowerPoint and visual materials, including videos and short films.

• **Scientific Assessment:**

- We evaluate trainees skills before and after the course to ensure their progress.

• **Brainstorming and Interaction:**

- We encourage active participation through brainstorming sessions and applying concepts through role play.

• **Practical Cases:**

- We provide practical cases that align with the scientific content and the participants specific needs.

• **Examinations:**

- Tests are conducted at the end of the program to assess knowledge retention.

• **Educational Materials:**

- We provide both printed and digital scientific and practical materials to participants.

• **Attendance and Final Result Reports:**

- We prepare detailed attendance reports for participants and offer a comprehensive program evaluation.

• **Professionals and Experts:**

- The programs scientific content is prepared by the best professors and trainers in various fields.

• **Professional Completion Certificate:**

- Participants receive a professional completion certificate issued by the Scandinavian Academy for Training and Development in the Kingdom of Sweden, with the option for international authentication.

• **Program Timings:**

- Training programs are held from 10:00 AM to 2:00 PM and include coffee break sessions during lectures.
