| 118 | Zurich (Switzerland) | Hotel Meeting Room | 2025-03-10 | 2025-03-14 | 5950 € | En - 25 |

Program Objectives:

By the end of the program, participants will be able to:

- Apply the latest concepts and techniques needed for effectively planning, scheduling and controlling maintenance activities.
- Manage routine, corrective, as well as large scale preventive maintenance activities.
- Review the critical operational requirements for successful planning and control of the maintenance work.
- Use the right Key Performance Indicators (KPIs) for the measurement and evaluation of the maintenance department.

This Program is designed for:

Managers, supervisors and planners responsible for maintenance planning, scheduling and control activities. This program is worth 25 NASBA CPEs.

Program Outline:

Objectives of Maintenance

What Is Maintenance?

- Evolution of Maintenance
- Challenges Facing Maintenance
- Types of Maintenance
- Classification of Roles in Maintenance
- Customer Service in Maintenance

The Work Order System

- Purpose of the Work Order System
- Information Collected on a WO
- Job Estimating Methods
- Prioritizing Maintenance Work

Preventive Maintenance (PM)

- Understanding PM
- Implementing a PM Program
- Establishing Scheduling
- Breaking a Facility Into Logical Parts
- Developing an Equipment List
- Writing PMs
- Developing Equipment Manuals
- Setting Up Inventory

Planning and Scheduling of Major Maintenance WOs and Shutdowns

- Planning and Scheduling
- Work Breakdown Structure
- Critical Path Method (CPM)
- Resource Scheduling and Leveling

Life Cycle Cost of Equipment

- Capital Budgeting
- Accounting Rate of Return (ARR)
- Payback Method
- Net Present Value Method (NPV)
- Replacement Analysis of Equipment

Planning and Controlling Maintenance Materials

- Inventory Costs
- Considerations in Inventory Decisions
- Economic Order Quantity (EOQ)
- Total Material Cost.
- When to Order

Safety in Maintenance

- Myths About Safety
- Accidents and Injuries
- Unsafe Acts and Unsafe Conditions
- Cost of Accidents
- Safety Audit

Controlling Maintenance Work

- Measuring Performance
- · Sources of Data
- Backlog Indices
- Schedule Compliance
- PM and Emergency Indices
- Productivity Indicators

The Scandinavian Academy for Training and Development employs modern methods in training and skills development, enhancing the efficiency of human resource development. We follow these practices:

• Theoretical Lectures:

We deliver knowledge through advanced presentations such as PowerPoint and visual materials,
including videos and short films.

• Scientific Assessment:

 $\circ\,$ We evaluate trainees skills before and after the course to ensure their progress.

• Brainstorming and Interaction:

 We encourage active participation through brainstorming sessions and applying concepts through role play.

• Practical Cases:

• We provide practical cases that align with the scientific content and the participants specific needs.

• Examinations:

• Tests are conducted at the end of the program to assess knowledge retention.

• Educational Materials:

• We provide both printed and digital scientific and practical materials to participants.

• Attendance and Final Result Reports:

• We prepare detailed attendance reports for participants and offer a comprehensive program evaluation.

• Professionals and Experts:

• The programs scientific content is prepared by the best professors and trainers in various fields.

• Professional Completion Certificate:

Participants receive a professional completion certificate issued by the Scandinavian Academy for
Training and Development in the Kingdom of Sweden, with the option for international authentication.

• Program Timings:

 Training programs are held from 10:00 AM to 2:00 PM and include coffee break sessions during lectures.
