Introduction

In the competitive environment of today, availability and reliability of assets are more than ever an important issue. A significant trend in maintenance is outsourcing maintenance activities to contractors. Maintenance contracts are being applied as a highly effective way to manage and control the relationship between the service provider and the end-user, both internally and externally. It manages the expectations of both parties, sets out the parameters of responsibility and offers performance indicators.

This training seminar will ensure that you understand how to decide rationally what maintenance activities to outsource and what not, how to select the best maintenance contractor and how to evaluate the delivered performance of all parties involved. You will understand the different contract types, get the most from your contracts, avoid the potential pitfalls and improve the performance of your assets. Maintenance contracts used in several branches will be discussed. You will have the opportunity to discuss the existing contracts used in your organization. Through a combination of formal lectures and group work, you will leave the seminar with the tools to improve your contracts and contract management.

This seminar introduces participants to the skills and knowledge areas of

Maintenance Contracts & Outsourcing of today, such as:

- Understanding Outsourcing considerations
- Contracting types, incl. Service Level Agreements
- Key Performance Indicators to monitor performance

- Developing contracts – the contracting cycle
- Negotiating skills
- Continuous improvement and performance management: how to evaluate the performance with all parties involved

Seminar Objectives

The delegates will:

- Understand how to decide rationally what maintenance activities to outsource and what not
- Learn the features, functions and benefits of lean maintenance contracts
