### Introduction

It is crucial that today's business professionals understand the flow of financial resources. Such an understanding is needed daily; whether it is used to anticipate trends, evaluate company performance or obtain funding. People from non-financial backgrounds are often called upon to make decisions based on modern financial products, and they must have the know-how to navigate the financial systems that have a significant impact on their professional responsibilities.

Oxford Management Centre has created the 5 Day MBA in Finance to provide business professionals with a deeper understanding of corporate finance as practiced by today's most powerful companies.
