Course: IT Project Management

Code	City	hotel	Start	End	price	Hours
377	Singapore (Singapore)	Hotel Meeting Room	2024-09-30	2024-10-04	5950 €	25

Why Choose this Course?

The course is intended for professionals in IT technical and non-technical work areas who need to acquire a high competency in IT project management including project control, documentation, tools and processes.

IT Projects are difficult as they demand constant attention and control. IT projects now live in an agile world where things can happen and the project manager must react and deal with these situations. The course is designed to provide the competencies needed to work within the IT project environment.

This course will feature:

- Comprehensive understanding of the various processes of IT project management.
- Advanced set of project management tools & techniques for IT project application at the workplace.
- Working templates, forms and checklists relevant for use in IT projects at their place of work.
- Understand core IT Project management concepts and applications.

- Appraising the value and role of the IT Project Manager.

What are the Goals?

By the end of this course, participants will be able to:

- Understand project management lifecycle, methodology and terminologies.
- Apply project templates for IT project management and control
- Anticipate possible project problems, opportunities, action steps, project contingencies & project risks.
- Appreciate the use of project management software.
- Understand how to implement an IT Project Management Office.

Who is this Course for?

This course is suitable to a wide range of professionals but will greatly benefit:

- Those who are directly involved in planning and implementation of any kind of IT projects
- Those who require an advance set of tools to assist in cost estimation, cost

tracking, procurement, contract, risk assessment and management, quality control and scope verification.

- Those who are new to the IT industry and require to understand how to manage / participate in IT projects

How will this be Presented?

This course will utilise a variety of proven adult learning techniques to ensure maximum understanding, comprehension and retention of the information presented. The course is highly interactive and is carefully designed to provide the best mix of experience, theory and practice in a professional learning environment. The emphasis is on real case studies, and practical applications through “hands-on” action learning. The use of project management software and techniques will be used to help delegates understand project management concepts.

The Course Content

Day One

Background for an IT Project Manager

- IT project life cycle: initializing, planning, execution, monitoring & controlling, and closing processes
- Waterfall to Agile Project in IT
- Stakeholder conflicts of interest, and how to resolve them

- Selecting project manager and team members
- The role of a Project Management Office(PMO)
- IT Project Leadership, Conflict and Motivation Styles
- Practical Exercise: Personality profiling

- Decomposing a project (business) need
- Appraising IT project investments – tangible and intangible quantification techniques
- Developing the IT Requirements
- Developing the Project Schedule
- Estimating and agreeing the project resources

- Analysing the project plan
- Practical Exercise: Creating a project charter for a group project
- Practical Exercise: Constructing a WBS for a group project
- Practical Exercise: Producing a task (work package) listing
- Practical Exercise: Determining resource requirements and task costs
- Practical Exercise: Calculating the Critical Path

Day Three

Managing the Project

- Resource planning – resource scheduling and resource levelling
- Determining roles and responsibilities for team members
- Risk and Issue Management – identifying and controlling
- Issue and change management processes

- Controlling the Project Status
- Managing project vendors
- Practical Exercise: Resource leveling assignment
- Practical Exercise: Creating a human resource management plan
- Practical Exercise: Risk brainstorming exercise and creating a risk register
- Practical Exercise: Creating a statement of work (SOW) for contractors and vendors
- Practical Exercise: Developing a formal project plan, and get approval

Day Four

Executing the Project

- Executing the project plan
- Distribute project information to stakeholders - management and technical reports
- The change control system (change management plan)

- Project performance measurement
- Create performance measurement report
- Baseline techniques / Earned Value Analysis (EVA)
- Practical Exercise: Creating a technical report
- Practical Exercise: Creating a management report
- Practical Exercise: Creating a change request
- Practical Exercise: Creating a performance report

Day Five

Closing the Project

- Validating the Scope
- Contract close-out administration - procurement audits
- Verifying the Product

- Monitoring Customer Satisfaction
- How to use Lesson Learnt
- Practical Exercise: Creating a formal acceptance document
- Practical Exercise: Creating a handover acceptance document
- Practical Exercise: Creating a lessons learned document

The Scandinavian Academy for Training and Development employs modern methods in training and skills development, enhancing the efficiency of human resource development. We follow these practices:

- **Theoretical Lectures:**

- We deliver knowledge through advanced presentations such as PowerPoint and visual materials, including videos and short films.

- **Scientific Assessment:**

- We evaluate trainees skills before and after the course to ensure their progress.

- **Brainstorming and Interaction:**

- We encourage active participation through brainstorming sessions and applying concepts through role play.

- **Practical Cases:**

- We provide practical cases that align with the scientific content and the participants specific needs.

- **Examinations:**

- Tests are conducted at the end of the program to assess knowledge retention.

- **Educational Materials:**

- We provide both printed and digital scientific and practical materials to participants.

- **Attendance and Final Result Reports:**

- We prepare detailed attendance reports for participants and offer a comprehensive program evaluation.

- **Professionals and Experts:**

- The programs scientific content is prepared by the best professors and trainers in various fields.

- **Professional Completion Certificate:**

- Participants receive a professional completion certificate issued by the Scandinavian Academy for Training and Development in the Kingdom of Sweden, with the option for international authentication.

- **Program Timings:**

- Training programs are held from 10:00 AM to 2:00 PM and include buffet sessions for light meals during lectures.
