## The Course

Managerial accounting is an activity that provides financial and nonfinancial information to business managers and other internal decision makers of an organization. This course examines how managerial accounting information is gathered, and how it is used by business professionals to make effective plans & decisions. Lessons such as fundamentals of managerial accounting, cost accounting concept, and managerial accounting approaches will provide you with the concepts, procedures, and analytical skills you`ll need to make informed decisions in today`s challenging business world.

Managerial accounting is not as widely used as other forms of accounting, nor is it as known. While companies concern themselves with financial accounting methods like audits, budgets and financial statements, they often completely ignore the forward-thinking methods of managerial accounting.

### Key points include:

- Managerial vs. financial accounting
- Cost-Volume-Profit analysis for decision making
- Make vs. buy decisions for planning
- Fixed vs. variable vs. mixed costs for control
- Capital budgeting that makes a difference
