# Course: Power Distribution Equipment

Code	City	Hotel	Start	End	Price	Language - Hours
EE-790	Hong Kong	Hotel Meeting Room	2027-01-04	2027-01-08	5950 €	En - 25

## Introduction

Power distribution equipment which are reliable, safe, and efficient are essential for an electrical installation. This Power Distribution Equipment training course includes the construction, operation, and maintenance aspects of the equipment namely the transformers, circuit breakers, ring main unit, switches, and protection devices. Safe operations are essential as they are protected by modern and sophisticated relays and protection devices. Power distribution can either be overhead or underground and auxiliary power is obtained by means of uninterruptible power supply.

Protection systems are installed to prevent faults from damaging electrical plant and to initiate isolation of faulted sections to maintain continuity of supply elsewhere on the system. Recent changes in technology together with changes in the way utilities and industrial organisations operate, has greatly emphasized the development of integrated protection and control.

### This training course will feature:

- The construction and operations of transformers
- The characteristics of circuit breakers
- The importance and role of UPS and batteries
- The types of maintenance
- The functionalities of protection relays

### What are the goals?

- Understand the major power distribution equipment
- Determine the various types maintenance strategies
- Explain the different types of circuit breakers
- Analyse the characteristics of oil immersed transformers
- Design a simple electrical power distribution incorporating the main power distribution equipment

## **Who is this training course for?**

- Electrical engineers
- Electrical supervisors
- Power engineers
- Managers in-charge of electrical installations
- Project engineers

## **Course Outline**

### **Day One: Distribution Power Transformers Types, Characteristics, Operations and Protection:**

- Types and design of power transformers
- Oil immersed transformers
- Major components of a power transformer
- Vector groups for transformers
- Cooling systems for transformers
- Fault level and impedance percentage of a transformer

### **Day Two: Construction and Characteristics Switches and Circuit Breakers:**

- Construction and operation of load break switch, earth switches and isolators
- Construction and operation of molded case circuit breaker

- Construction and operations of air circuit breaker
- The electronic trip of an air circuit breaker
- The construction and operation of vacuum circuit breaker
- Characteristics of vacuum circuit breaker

### **Day Three: SF6 and High Voltage Circuit Breakers:**

- SF6 arc quenching characteristics
- SF6 circuit breaker operations and characteristics
- Live tank high voltage circuit breaker
- Dead tank high voltage circuit breaker
- Safety of SF6 circuit breakers
- New alternative grid green gas

### **Day Four: Auxiliary Power by Means of Batteries and Uninterruptible Power**

#### **Supply (UPS):**

- Critical loads and distribution equipment categories
- Types of online and offline UPS design
- Components functionalities of a UPS
- Double conversion UPS
- Redundancy and parallel operation of UPS
- UPS operational modes

### **Day Five: Maintenance and Safety of Power Distribution Equipment:**

- Functionalities of numerical relays
- Maintenance strategies
- Partial discharge and its effects
- Merits of thermography
- Power quality measurement instruments
- Wrap up session and Q&A session

The Scandinavian Academy for Training and Development adopts the latest scientific and professional methodologies in training and human resource development, aiming to enhance the efficiency of individuals and organizations. Training programs are delivered through a comprehensive approach that includes:

- Theoretical lectures supported by PowerPoint presentations and visual materials (videos and short films).
- Scientific evaluation of participants before and after the program to measure progress and knowledge acquisition.
- Brainstorming sessions and practical role-playing to simulate real-life scenarios.
- Case studies tailored to align with the training content and participants work nature.
- Assessment tests conducted at the end of the program to evaluate the achievement of training objectives.

Each participant will receive comprehensive training materials, including theoretical content, practical exercises, and supporting resources, provided in both printed and digital formats. Detailed reports, including attendance records, final results, and overall program evaluations, are also provided.

Training materials are prepared professionally by a team of experts and specialists in various fields. At the end of the program, participants are awarded a professional attendance certificate, signed and accredited by the Scandinavian Academy for Training and Development.

### **Program Timings:**

- 9:00 AM to 2:00 PM in Arab cities.
- 10:00 AM to 3:00 PM in European and Asian cities.

### **The program includes:**

- A daily Coffee Break provided during the sessions to ensure participants comfort.
