## The Course

Commercial and business relationships are based on contracts of one type or another. These are becoming increasingly complex, and as trade becomes ever more international, the differences in approach between different legal and contracting systems becomes a greater issue. All business professionals need to understand what a contract does (and does not) require them and the other party to the contract to do, and the consequences for both parties of any failure. This course is intended to provide an understanding of contracting in the English language, but in an international context.

## The Goals

To enable delegates to improve their understanding of the role of contracts within a business, and how strategies can be developed to improve the commercial outcomes, and the management of contracts. The course will also give delegates the opportunity to consider the latest international thinking in dispute resolution, and how this can be used in everyday business life to reduce conflict and the costs and delays associated with more conventional approaches

## The Delegates

Representatives of all functional disciplines would benefit from this course. The course is particularly recommended for actual or potential purchasing ,contracts or project

professionals, and for anyone who contributes to projects, or is involved in the management of a business unit.

## **The Process**

The training methodology will be a combination of conventional teaching, supported by real examples and case studies. Delegates will also be given the chance to work on short exercises to develop their skills, and encouraged to discuss real problems from within their organizations or elsewhere. Delegates will be encouraged to look at contractual issues and try out thinking on new ideas in a safe environment

## **The Benefits**
