Overview

Introduction

This seminar is designed to provide IT leaders and professionals with a set of transformational tools and techniques to help them maximise their own and their team's creative potential. The starting-point for this seminar is self-discovery; participants will work on the inside first and then focus outwards onto the world of business.

The initial focus of the seminar will be:

- Preparation to move out of your comfort zone and experiment with new ways of creating and communicating an inspiring leadership vision.
- To define IT strategy and set out techniques for leading an agile IT organisation that is customer-centric, makes good strategic management and technical decisions and leverages IT resources effectively.
- The emphasis on the strategic importance of information services to the enterprise and their contribution as a critical partner in meeting business goals.
- Identifying opportunities for new kinds of thinking and learning to challenge the givens without breaking the bonds
- How to improve your negotiation skills and overcome departmental and organisational obstacles to success

The seminar is split into two modules:

MODULE I - Leading Creatively

MODULE II - Strategic IT Leadership

Each module is structured and can be taken as a stand-alone course; however, delegates will maximise their benefits by taking Module 1 and 2 back-to-back as a two-week seminar.

Objectives

By the end of this programme you will be able to:

- Set out their personal leadership brand
- Demonstrate innovative methods for harnessing others' creative potential
- Articulate a vision using multiple sensory representations
- Communicate their vision in refreshing and engaging ways
- Identify critical components of a strategically-aligned IT department
- Apply value and performance measurement techniques
- Develop meaningful recruitment and retention policies
- Evaluate technology solutions, vendor selection and outsourcing

Training Methodology

This seminar will not rely on a series of lectures to tell you what you should be doing. Instead it uses a range of approaches to learning, including experiential group activities, individual visioning exercises and syndicate discussions, to allow you to see and feel for yourself the power of the creative mind. Formal inputs are used to introduce a limited amount of underpinning theory. A key part of the learning process is sharing the differing experiences participants bring, as well as experimenting with novel - and sometimes challenging - techniques.

Organisational Impact

- Leaders at all levels who can develop and communicate a shared vision are better able to engage and motivate their teams and can focus on longer-term organisational and customer needs.
- IT professionals who can align IT and corporate strategy are better able to demonstrate the return on investment of their function.
- Delegates develop and implement visionary, innovative and effective IT strategies that support the corporate vision and contribute demonstrably to its success.
- Focus on long-term organisational and customer needs
- Increased effectiveness against personal KPI's through more effective use of team

Personal Impact

- Participants will be challenged to explore and articulate a personal vision of the future based on aligned and coherent values within and beyond the boundaries of their professional sphere.
- Clear sense of personal and professional vision of the future
- Aligned and coherent personal values
- Stronger personal self-confidence levels
- Opportunities for networking and sharing ideas will provide a further catalyst to personal growth.

SEMINAR OUTLINE

Module I

Leading Creatively

Creative Problem-Solving

- Leadership Reality Assessment
- Leadership Vs Management
- Understanding Our Brain Function
- Myths of Creativity
- The limitations of the rational
- Divergent approaches to problem-solving

- Balancing tactical and strategic decisions
- Evaluating new and existing technologies
- Balancing management styles and culture.

The Scandinavian Academy for Training and Development employs modern methods in training and skills development, enhancing the efficiency of human resource development. We follow these practices:

• **Theoretical Lectures:**

- We deliver knowledge through advanced presentations such as PowerPoint and visual materials, including videos and short films.

• **Scientific Assessment:**

- We evaluate trainees skills before and after the course to ensure their progress.

• **Brainstorming and Interaction:**

- We encourage active participation through brainstorming sessions and applying concepts through role play.

• **Practical Cases:**

- We provide practical cases that align with the scientific content and the participants specific needs.

• **Examinations:**

- Tests are conducted at the end of the program to assess knowledge retention.

• **Educational Materials:**

- We provide both printed and digital scientific and practical materials to participants.

• **Attendance and Final Result Reports:**

- We prepare detailed attendance reports for participants and offer a comprehensive program evaluation.

• **Professionals and Experts:**

- The programs scientific content is prepared by the best professors and trainers in various fields.

• **Professional Completion Certificate:**

- Participants receive a professional completion certificate issued by the Scandinavian Academy for Training and Development in the Kingdom of Sweden, with the option for international authentication.

• **Program Timings:**

- Training programs are held from 10:00 AM to 2:00 PM and include coffee break sessions during lectures.
