

# Course: Pavement Design & Construction of Municipal Roadways

Code	City	hotel	Start	End	price	Hours
334	New York (US)	<b>Hotel Meeting Room</b>	2024-07-08	2024-07-12	6950 €	25

### **OVERVIEW**

# After participating in this course, you will be able to:

- Follow the visual inspection methods used by specialists
- Use the latest destructive and non-destructive investigation techniques when conducting a building condition survey
- Select destructive and non-destructive testing techniques based on their strengths and limitations, and suitability to your concrete, steel, timber and masonry structures
- Interpret building system results
- · Assess the useful life of the building systems and the whole building

# **Description**

As buildings age, those responsible for them must get involved with condition surveys. These individuals have to evaluate materials, conduct destructive or non-destructive tests, evaluate results and decide on the necessary actions for structural rehabilitation. This seminar explains the step-by-step procedures for conducting a condition survey of concrete, steel, timber and masonry structures, HVAC, mould, plumbing, electrical and fire safety systems.

The strengths and limitations of destructive and non-destructive techniques, along with their suitability for a variety of situations, are discussed.

## **Course Outline**

- Assessing Building Conditions
- Structural Condition of Wood, Steel and Concrete
- Masonry Structures
- Foundations
- Building Envelope: Testing and Monitoring
- Roofing, Doors and Windows
- Mould
- Site Elements and Life Expectancy
- Fire Safety

- HVAC Components and Plumbing Systems
- Electrical Systems
- Workshops
- Facility Condition Index
- Review Building Condition Assessment Reports and Case Studies

# Who Should Attend

- Structural Engineers
- Project Engineers and Managers
- Consulting Engineers
- Designers
- Facility Supervisors and Managers
- Building Services Managers
- Technicians and Technologists
- Capital Asset Personnel
- Inspection Personnel
- Architects

The Scandinavian Academy employs modern methods in training and skills development, enhancing the efficiency of human resource development. We follow these practices:

#### • Theoretical Lectures:

 We deliver knowledge through advanced presentations such as PowerPoint and visual materials, including videos and short films.

#### • Scientific Assessment:

• We evaluate trainees skills before and after the course to ensure their progress.

# • Brainstorming and Interaction:

 We encourage active participation through brainstorming sessions and applying concepts through role play.

#### • Practical Cases:

• We provide practical cases that align with the scientific content and the participants specific needs.

## • Examinations:

 $\circ\,$  Tests are conducted at the end of the program to assess knowledge retention.

# • Educational Materials:

• We provide both printed and digital scientific and practical materials to participants.

# • Attendance and Final Result Reports:

• We prepare detailed attendance reports for participants and offer a comprehensive program evaluation.

## • Professionals and Experts:

• The programs scientific content is prepared by the best professors and trainers in various fields.

# • Professional Completion Certificate:

Participants receive a professional completion certificate issued by the Scandinavian Academy for
Training and Development in the Kingdom of Sweden, with the option for international authentication.

# • Program Timings:

 Training programs are held from 10:00 AM to 2:00 PM and include buffet sessions for light meals during lectures.
