introduction

The security leader is the one who can control the various security situations through a good awareness of their dimensions and confronting them to the appropriate extent in light of his practices and his ability to communicate effectively with the parties to the situation. The security leader is the leader who is distinguished by leadership qualities and skills that distinguish him from other leaders, which makes him lead the group efficiently and competently, reach the desired goal, and control what arises from security conditions and crises, and this control is by making rational decisions that restore the security situation to what it was it previously.

There is no doubt that skills in general, and security skills and a sense of security in particular are of great importance to the security commander, because the availability of these skills is necessary to enable the commander to face emergency conditions that require rapid decision-making and implementation in order to achieve the maximum degree of success that ensures the elimination of the danger arising from The emergency crisis with minimal losses and maximum speed so that this situation does not result in security repercussions that negatively affect security, and this of course depends on the degree of rationality of the decision taken, because the more rational the security decision taken, the more effective it is in facing emergency and non-emergency crises alike. This course will address several topics, including the definition of the security sense, its characteristics, security leadership and predicting criminal danger, the security leader, security skills, the objectives of security skills, factors affecting the skills of the security leader, the controls that govern the security leader, and security leadership.

 - Methods of guarding gates, fences and buildings.
 - Construction of guard towers and their equipment
 - Technology for guarding and securing fences
 - Patrols guarding buildings and prohibited areas
 - Various protective lighting system
 - Alarms and television and regular surveillance
 - Fence protection devices such as sensors and invisible rays

The Scandinavian Academy employs modern methods in training and skills development, enhancing the efficiency of human resource development. We follow these practices:

- **Theoretical Lectures:**
 - We deliver knowledge through advanced presentations such as PowerPoint and visual materials, including videos and short films.
- **Scientific Assessment:**
 - We evaluate trainees skills before and after the course to ensure their progress.
- **Brainstorming and Interaction:**
 - We encourage active participation through brainstorming sessions and applying concepts through role play.
- **Practical Cases:**
 - We provide practical cases that align with the scientific content and the participants specific needs.
- **Examinations:**
 - Tests are conducted at the end of the program to assess knowledge retention.
- **Educational Materials:**
 - We provide both printed and digital scientific and practical materials to participants.
- **Attendance and Final Result Reports:**
 - We prepare detailed attendance reports for participants and offer a comprehensive program evaluation.
- **Professionals and Experts:**
 - The programs scientific content is prepared by the best professors and trainers in various fields.
- **Professional Completion Certificate:**
 - Participants receive a professional completion certificate issued by the Scandinavian Academy for Training and Development in the Kingdom of Sweden, with the option for international authentication.
- **Program Timings:**
 - Training programs are held from 10:00 AM to 2:00 PM and include buffet sessions for light meals during lectures.
